

## NOTICE

There are two firmware for SplashDrone 4 flight control. Please use the right firmware to update your remote control. Sorry for the inconvenience.

V01, V02, V03 refers to the ending of aircraft's SN number.

Here is how to choose the right firmware:

1. Check the SN number inside the battery chamber. Use the corresponding firmware to update for your SplashDrone 4.
2. Check the detector (also inside the battery chamber).
  - a. Without detector – V01/V02
  - b. With detector – since V03
